PROFILE

Backend Software Engineer experienced in building and maintaining production systems with Python, Django, Django REST Framework, PostgreSQL, Redis, and AWS. Develops secure APIs, asynchronous workflows, and real-time applications—including live cricket scoring and broadcast graphics driven by match data. Focused on solving production issues, improving performance, and writing clean, maintainable code.

PROFESSIONAL EXPERIENCE

Wtvision Solutions Private Limited

Software Engineer I | Noida | Feb 2025 – Present

Incentiwise — Enterprise Rewards & Recognition Platform

- Built backend services for a multi-tenant enterprise platform using Python, Django, Django REST Framework, and PostgreSQL, owning features from implementation through production support.
- Designed secure REST and public APIs with JWT authentication, role-based access control (RBAC), validation, pagination, filtering, and third-party integrations.
- Delivered configurable forms (quizzes, surveys, polls, pulse feedback), recognition feeds, badges, nominations, and approval workflows.
- Integrated Keka HRMS for employee lifecycle automation and Xoxoday for reward coupon distribution and redemption.
- Implemented Celery and Celery Beat workflows for scheduled emails, notifications, synchronization, cleanup, and automated tasks; added WebSocket-based real-time notifications.
- Investigated complex backend and production issues, traced failures across application and data layers, and refined query and bulk-import/export workflows for reliability and maintainability.
- Supported Docker-based deployments on AWS (EC2, ECR, S3) with Nginx, and worked to keep services modular, testable, and easier to extend.

CricStats — Real-time Cricket Scoring & Graphics Services

- Developed backend capabilities for a live cricket scoring platform, processing match events and delivering score updates through REST APIs and Django Channels/WebSockets.
- Worked across CricStats and its separate CricStats Graphics Service to drive multiple cricket broadcast graphics with live scoring data, supporting multilingual on-air graphics and ensuring match updates were reflected in real time.
- Built and refined event-driven data flows between scoring and graphics services; debugged synchronization and timing issues to help keep live data and broadcast output consistent.
- Collaborated with engineering, frontend, QA, and broadcast teams to troubleshoot integration issues and deliver reliable releases for live production use.

Galific Solutions Private Limited

Python Backend Developer Intern | Remote | Sep 2024 – Nov 2024

Clanner AI — AI-powered Short-Video Content Tool

- Developed and supported Flask API workflows for a platform that generates short-form videos from text prompts.
- Worked on video-processing features such as transitions, subtitles, and text overlays using MoviePy, OpenCV, and NumPy; supported scraping and AI-provider integrations.
- Debugged feature issues and helped integrate backend automation into the content-generation workflow.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, Django Channels, Flask, Celery, Celery Beat, Node.js, Express.js
APIs & Real-time: REST APIs, WebSockets, JWT, RBAC, multi-tenancy, third-party integrations, live data workflows
Databases & Cache: PostgreSQL, MySQL, MongoDB, Redis
Cloud & Tools: AWS (EC2, ECR, S3), Docker, Nginx, Git
Languages: Python, JavaScript; Go (learning)

EDUCATION

M.C.A. — Amity University Online | Jul 2025 – Present
B.A., English — Sido Kanhu Murmu University, Dumka | Jul 2021 – Jun 2024
